

## **CONNECTIONS SUMMER 2012**

Summer is an especially tough time for families with children that have developmental or physical limitations. Whether diagnosed with autism, speech/language delays, auditory processing or regulation difficulties. Kids Connection has developed a part-day inclusive program that will educate and entertain your child during the summer.

For most of our special students, unstructured time does not create a fulfilling environment. Kids Connection will create a structured, semi-inclusive environment to meet both the physical and cognitive challenges of your child. We will replicate a school environment with fun summer activities. This is great for those seeking a program close to home, therapist's part of the students' day and our part-day program allows for flexibility in your schedule.

This program includes the services of an Occupational Therapist, Developmental Therapist and Music Therapist.

**This class is 2.5 hours; meeting Tuesday (1:00-3:30). The fee is \$50 per week/paid monthly. Maximum class size is 10/Minimum 4; (ages 3-5).**

## **CONNECTIONS SCHOOL YEAR 2012-13**

This class was developed for children who benefit from a smaller class size, higher teacher to student ratio and more structured teaching techniques. All this reinforcement is in one place for our students diagnosed with autism, speech/language delays, auditory processing or regulation difficulties. This part-day inclusive program will not only meet the educational needs of your child but also offer a team approach while catering to the needs of each learning challenge.

For most of our special students, unstructured time does not create a fulfilling environment. The Connections program will create a structured, semi-inclusive environment to meet both the physical and cognitive challenges of your child. We will replicate a school environment to include integration with other peers during motor groups, centers and/or story time. Students will do group work with preschool teachers, and the therapist to develop communication skills, motor skills, self-help skills and social skills.

This program includes the services of an Occupational Therapist, Developmental Therapist and Music Therapist.

**This class is 2.5 hours; Wednesday PM (12:30-3:00) and/or Friday AM (9:15-11:45). The fee is \$50 per week/paid monthly. Maximum class size is 10/Minimum 4; (ages 3-5).**
